...we are expanding the offer
of **veneer surfaces**

FOR VENEER DOORS
WE ARE THE SPECIALISTS

Veneer is a unique material created by nature itself. At Sapeli we will take up work with reverence in order to create a perfect result – beautiful and perfectly veneered doors in every detail. Come and see the latest trends in contemporary interior design and choose from more than 100 woods worldwide. In addition, we have expanded the range this year to include bleached oak veneer.

REDE®

The new REDE model range is characteristic for the use of the elegant horizontal and vertical V slots. The model range includes door models from full to glazed or fully glazed. We recommend a combination with the new **MINI** doorframe.

...we create **trends**

TALIA®

Slim lines and simple design are the main features of the new TALIA model range. Unique glazing detail without mouldings. Cleanliness and simplicity with perfect workmanship define the extensive use of these doors. We recommend a combination with the new **MINI** doorframe.

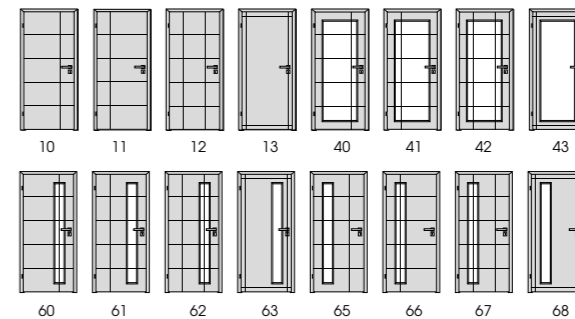

DOORS
model 43 and 13
colour plain RAL 1015

DOORFRAME
Obtus
colour plain RAL 1015

GLASS
Satin white

HANDLE
Senza

Model REDE is exceptional thanks to the use of the elegant vertical and horizontal V slot which subtly dissects the surface of the door leaf. This effect will highlight the sunken mouldings in the glazed versions.
